You have a voice, and I want to hear it!
I love IFPTE Local 21, I appreciate everything we’ve done as a Union in protecting our jobs, our wages and our benefits. Previously in the private sector, I remember how it was without a Union.

A member since 2012 and a delegate of the San Francisco Professional Engineer’s chapter, I have gained an understanding of the inner-workings of the Union. And I see much needed improvements, including more transparency, open communication, and inclusion, in order for our union to carry out its basic purposes, to represent members and to be a strong united voice.

As a female minority engineer, I understand the abounding efforts it takes to be heard. I want to make IFPTE Local 21 a member-focused Union. Whether you are aspiring to advance your career, or ready to leave a legacy and transition into retirement, your concerns are not your own. You have a voice, and I want to hear it!

I see serving as Executive Vice President as an opportunity as well as a responsibility, to ensure our Union projects a bright and hopeful future for civil service. I understand the supreme dedication each of us brings, yet looming uncertainties like whether we can afford to send our children to college without giving up our own dreams, or whether we can keep a job and make the bay area our home through retirement, still persist. During these unprecedented times when our employers are faced with budget shortfalls, that even our jobs and basic livelihoods are at risk, it is imperative that we stand together, to protect our members, our jobs, and to ensure we recover and thrive.

My name is Janey Chan, employee at City and County of San Francisco, and a IFPTE Local 21 member and delegate. As your Vice President, I am here to listen and deliver union transparency. I will work with our Executive Committee, Chapter leaderships and members, in unity, to bargain and negotiate for you.

Local 21 sisters and brothers, I ask for your support. Bring your ballot to the mail.

VOTE JANEY CHAN
as Executive Vice President.
